

BOI FreeDa editions:

- ➔ **BOI FreeDa Direct** offers direct table maintenance; all changes are immediately activated in the database.
- ➔ **BOI FreeDa Table Edition** enables data storage and processing to be separated throughout the entire maintenance process. It also supports table checks, connection to external systems, and customerspecific functions via scripts.
- ➔ Die **BOI FreeDa Workflow Edition** supports individual maintenance workflows, bi-temporal database formats, multi-client capability, and the maintenance of sub-tables and packages.

	BOI FreeDa Direct	BOI FreeDa Table	BOI FreeDa Workflow
